Colleges, California State University,
University of California, and
Private Colleges Statewide*

What eTranscript California can do for your college:

eTranscript California is a Web-based, electronic transcript exchange system for California colleges and universities and their transcript-trading partners. Providing secure, value-added request and delivery services, eTranscript California automates transcript exchange for the benefit of colleges and students:

Request Transcripts

- Request single or bulk transcripts
- Identify trading-partner preferences for transcript processing
- Receive electronic message confirmation

Fulfill Transcripts

- Track transcript fulfillment progress through visual workflow process
- Upload and transmit transcripts
- Receive e-mail and electronic message confirmation throughout the process
- Send XML and EDI transcripts via UT Austin SPEEDE server

Receive Transcripts

- View, print, and download transcripts
- Three standard online transcript views: brief, full, and general education
- Receive standards-based transcripts for easy loading into local Student Information Systems
- Receive XML and EDI transcripts via UT Austin SPEEDE server
- Receive standardized high school transcripts

Administer Transcripts

- View transcript request and submission reports
- Access complete transaction event history
- Manage account
- Configure workflow preferences, including transcript fee and waiver rules, fulfillment processes, control and expiration options, e-mail communication, and institution information

What college personnel say about eTranscript California:

"Transcript exchange is handled wholly electronically and delivery is nearly instantaneous versus the speed of postal mail. Our system is configured to process 500 transcripts every 15 minutes. That's 2,000 an hour and that's more than enough."

- Kim Goff, Admissions and Records Supervisor,
Sacramento City College

"eTranscript California addresses the business needs and accommodates the business practices of college record offices while adhering to IT standards. It is designed to interface well with all leading Student Information Systems. We see a significant reduction of overall workload just in the time formerly used to manually create notifications."

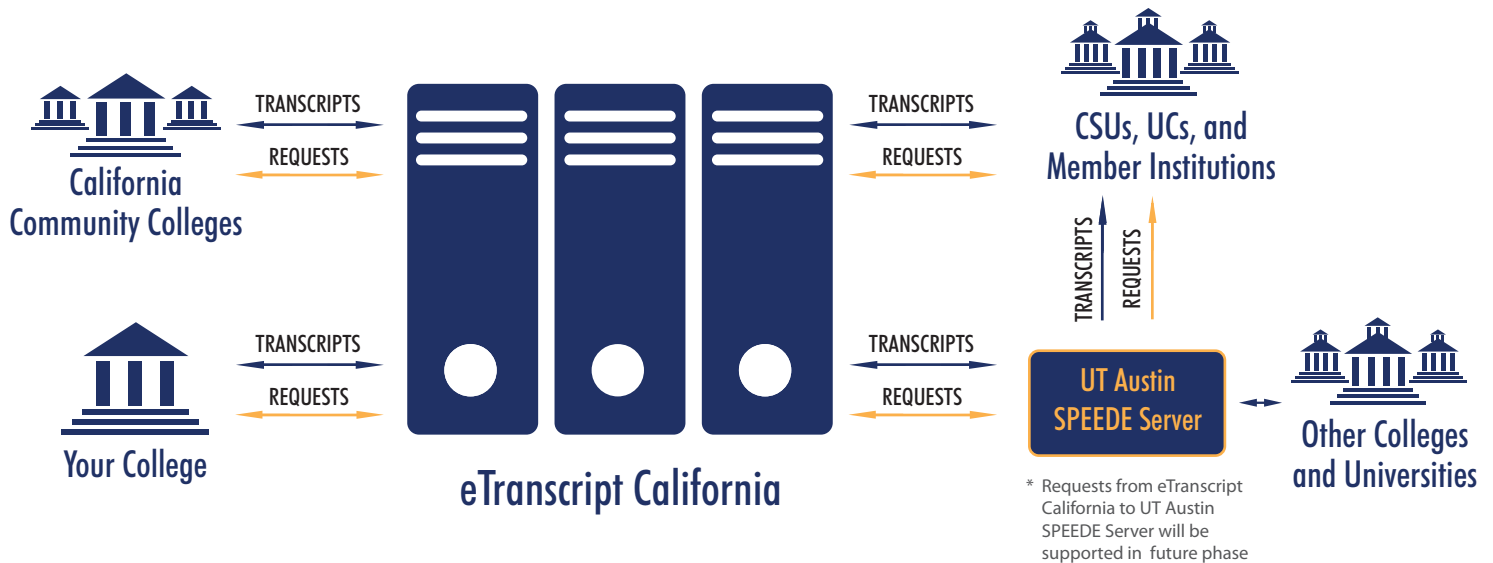

- Kris Backus, Information Technology Analyst,
Los Rios Community College District

"The leadership and hard work put into this project by our pilot community colleges and those of the CSU system have resulted in the most advanced and secure transcript exchange system available today. As more community colleges go online with eTranscript California, we will see significant cost savings across the system."

- Patrick Perry, Vice Chancellor,
Technology, Research, and Information Systems, CCC Chancellor's Office

How eTranscript California works:

eTranscript California enables all California colleges to transfer student transcripts between the state's 110 California Community Colleges and the University of California (UC) and California State University (CSU) system, as well as California high schools and other higher education institutions, in and out-of-state.

Green data ...

eTranscript California is a wholly electronic and paperless transcript exchange system. While it allows for printing paper copies of transcripts, it is intended to fulfill the transcript process among partner institutions with only a minimal use of paper when compared to the traditional, paper-heavy exchange process.

Using less paper consumes fewer trees and limits the introduction of harmful chemicals used to create paper ... helping the earth (and us) to breathe easier!

... green savings.

The CCC System Office estimates that costs for eTranscript California member colleges will drop from an average of seven dollars per transcript to less than fifty cents per transcript.

A college that processes 10,000 transcripts in a semester pays approximately \$70,000 without eTranscript California. With eTranscript California, the same 10,000 transcripts would cost approximately \$5,000—a **projected savings of \$65,000!***

*These figures apply to the CCC system only and are offered as illustration. Actual results will vary.

"The electronic delivery and tracking of transcripts leads to a faster and more streamlined admissions process for students. These closely tracked transactions are encrypted and secure, eliminating errors and reducing the possibility of fraud inherent in accepting and re-entering paper transcripts."

- Diane Woodruff, Former Chancellor,
California Community Colleges Chancellor's Office

How to join eTranscript California:

There are two types of eTranscript California membership: One for the California Community Colleges system and one for the California State University, University of California, and all other interested institutions.

The California Community Colleges have a negotiated cost structure. There is a one-time installation fee and an annual rate. Discounts are available to smaller colleges and a multi-college discount is available when an entire district participates.

Interested California Community Colleges should contact:

Tim Calhoon

CCC Technology Center
530-879-4091
calhoonti@cccnext.net

CSU, UC, and all other interested institutions of higher education should contact Xap Corporation to discuss eTranscript California pricing:

Keith Franco

Xap Corporation
530-520-3471
keith@xap.com

The latest eTranscript California news, information, and details about getting started can be found at the eTranscript California Web site: www.etranscriptca.org.
