

Getting Started Trading Electronic Transcripts

Panel Discussion with Experienced Users

Moderators:

Kris Backus – Senior IT Analyst, Los Rios CCD

Lenny Robison – Project Manager, CCC Technology Center

Session Goals

- Provide stories of experienced implementers
- Help new implementers
- Expand adoption of “California Electronic Transcript Standard”
- CSUGE and IGETC Cert, Course Transferability, Associate Degree for Transfer, District-wide Transcripts
- Expand network of trading partners

Panelist Experiences

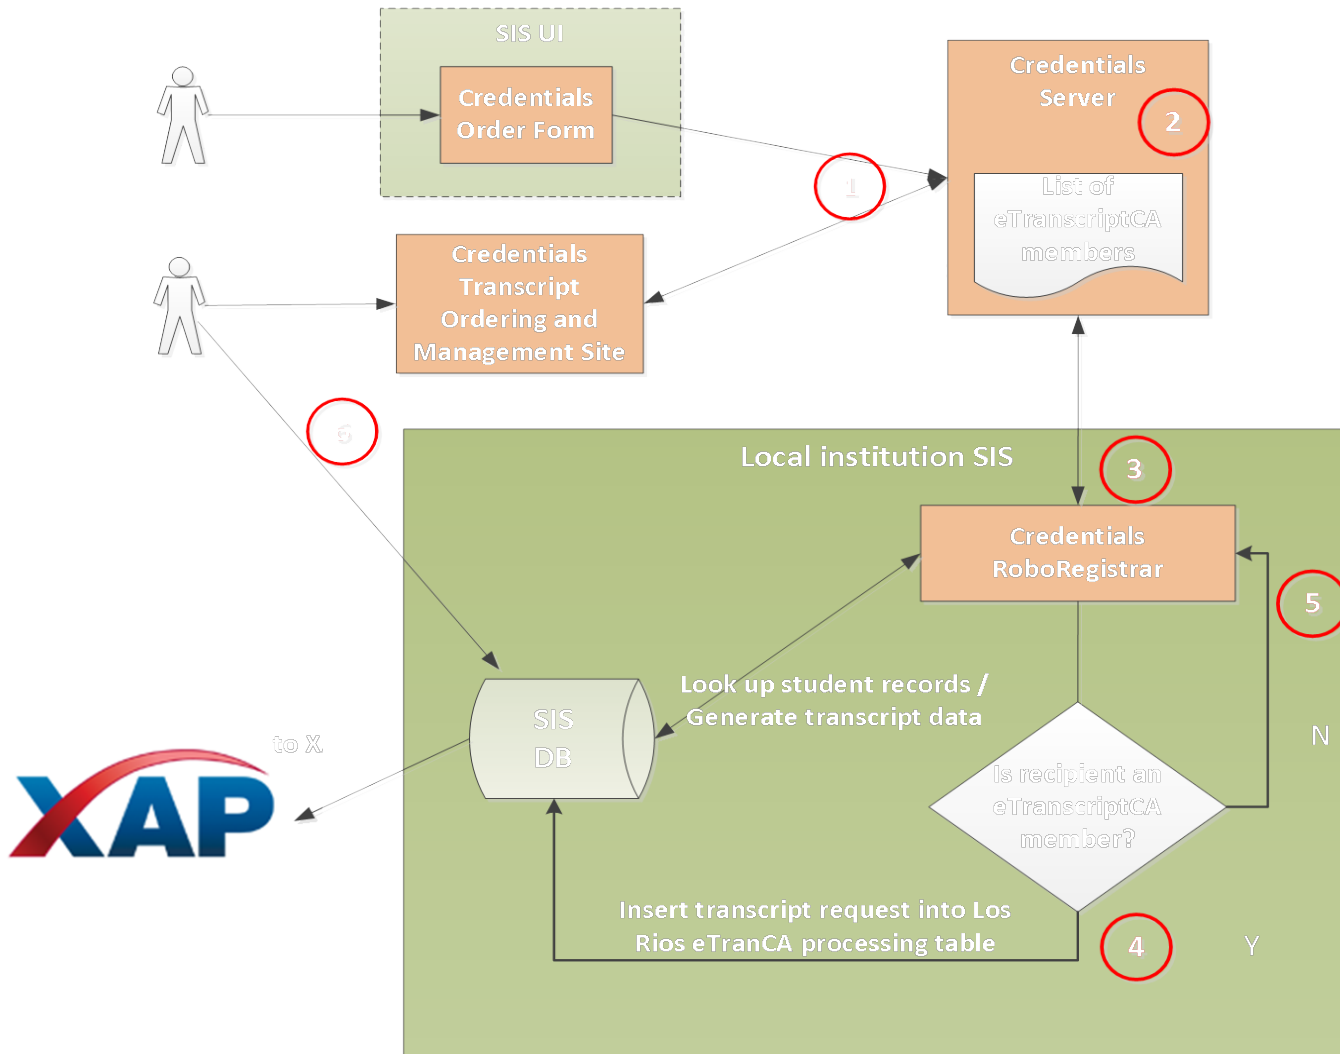

- Introductions
- Overviews by panel member
- Experiences with transcript exchange

Panel Members

- **Kris Backus - Senior IT Analyst, Los Rios CCD**
- **Joseph Hackbarth - IT Director, A&R, CSU Fullerton**
- **Al Mejia - Senior Applications Analyst, Cerritos College**
- **Rebecca Diaz - Business Analyst, Enrollment Management, SFSU**
- **Mike Wood - Senior Analyst / Programmer, Chico State**

Discussions may include:

- Which transcript vendor(s) are you using? How long?
- What resources were necessary for your college get into production?
 - Implementation timeline?
 - What were your major struggles in adopting electronic transcripts?
- Did you implement in phases? Explain.
- Is your college / university currently importing electronic transcripts?
 - Do you import transcript data into any in-house systems?
 - Do you use multiple data formats?
- Is your college / university currently sending electronic transcripts?
 - Is a student ordering portal used?
- Are admissions decisions affected by your receiving paper transcripts versus electronic transcripts?
 - What are the differences?
- What pieces of the CA Electronic Transcript Standard does your college use?

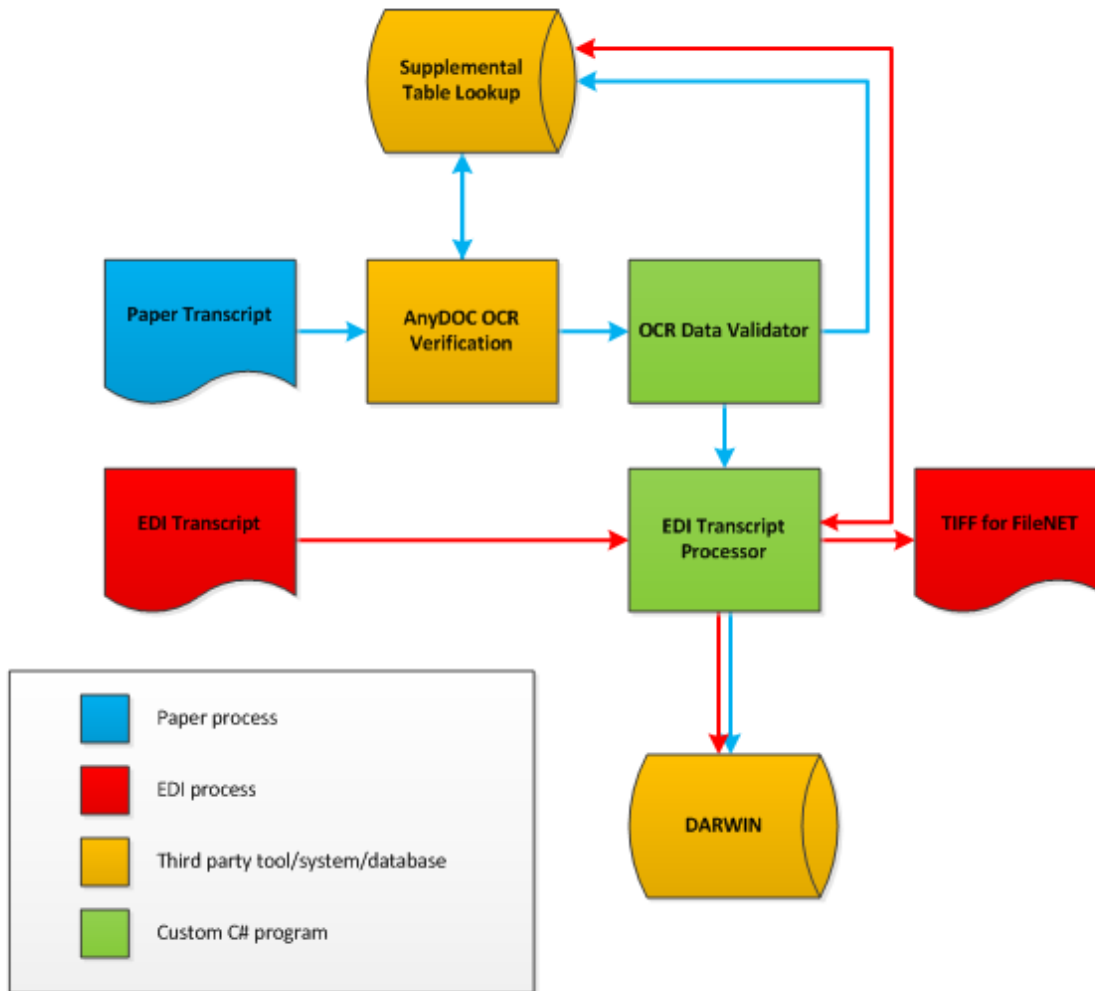

CSUF Processing Incoming EDI

Sources supported:

- eTranscript California
- Texas SPEEDE Server
- Credentials Solutions (via Texas SPEEDE)
- Docufide by Parchment
- AnyDOC OCR (for paper transcripts)

Background Details:

- Windows Server 2008 R2 Enterprise (on virtual server)
- XAP Communicator (running as scheduled service)
- WinSCP (scheduled with script)
- Bitwise SSH Server (for SFTP with Texas SPEEDE)

CSUF Reading the EDI

Custom developed process:

- Similar in concept to Texas SPEEDE's Quick 'n' Easy software.
- C# program developed using Visual Studio 2010.
- Windows GUI or command line for scheduled runs.
- Comprehensive log files of work performed.
- Multi-format support.
- SMTP support for emailing alerts and reports.
- Outputs text/image files of data formatted for easy reading.
