20 15-16 CCC Mini-grants

11 New Members by June 30th
Up to 18 more to follow

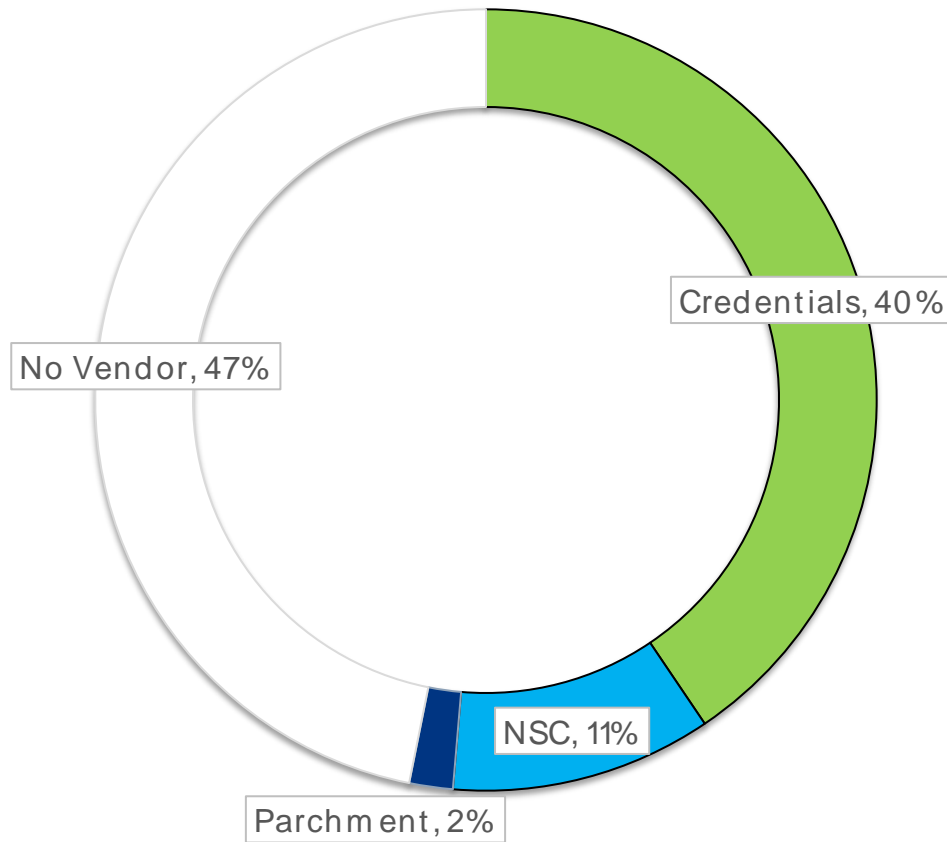

The Problem with SPEEDE

- All out of network transcripts pass through SPEEDE
- Single point of failure
- Legacy technology
- Third party storage of PII data (security)
- Slow
 - (20 minute delays in delivery) inhibits network-network and network-services communications and tracking

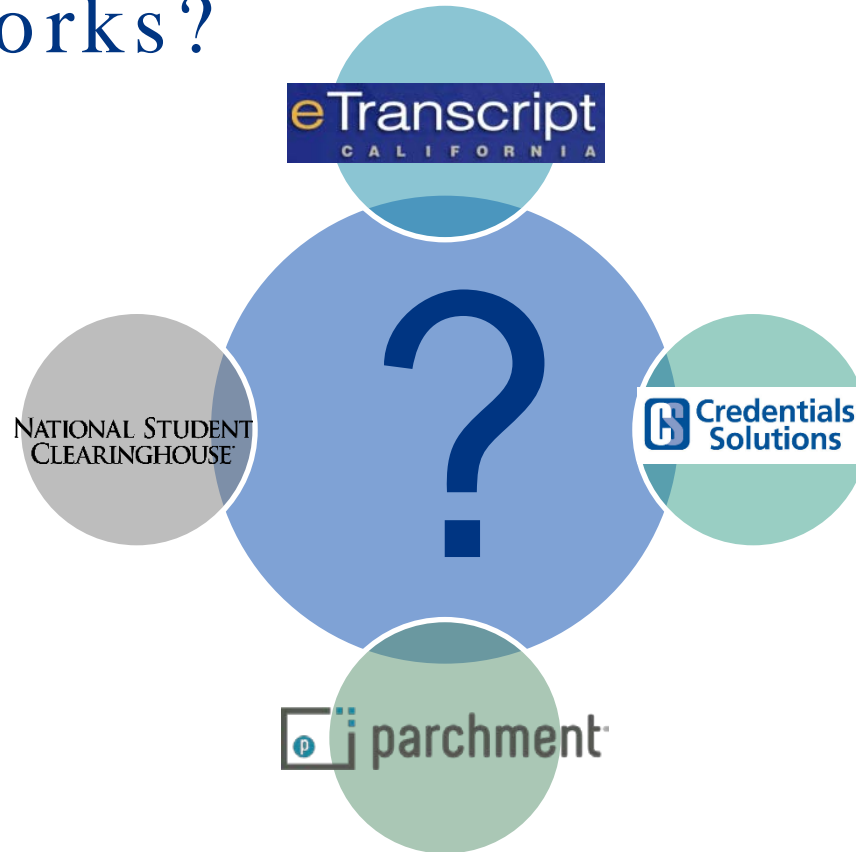

Vendors members also work with...

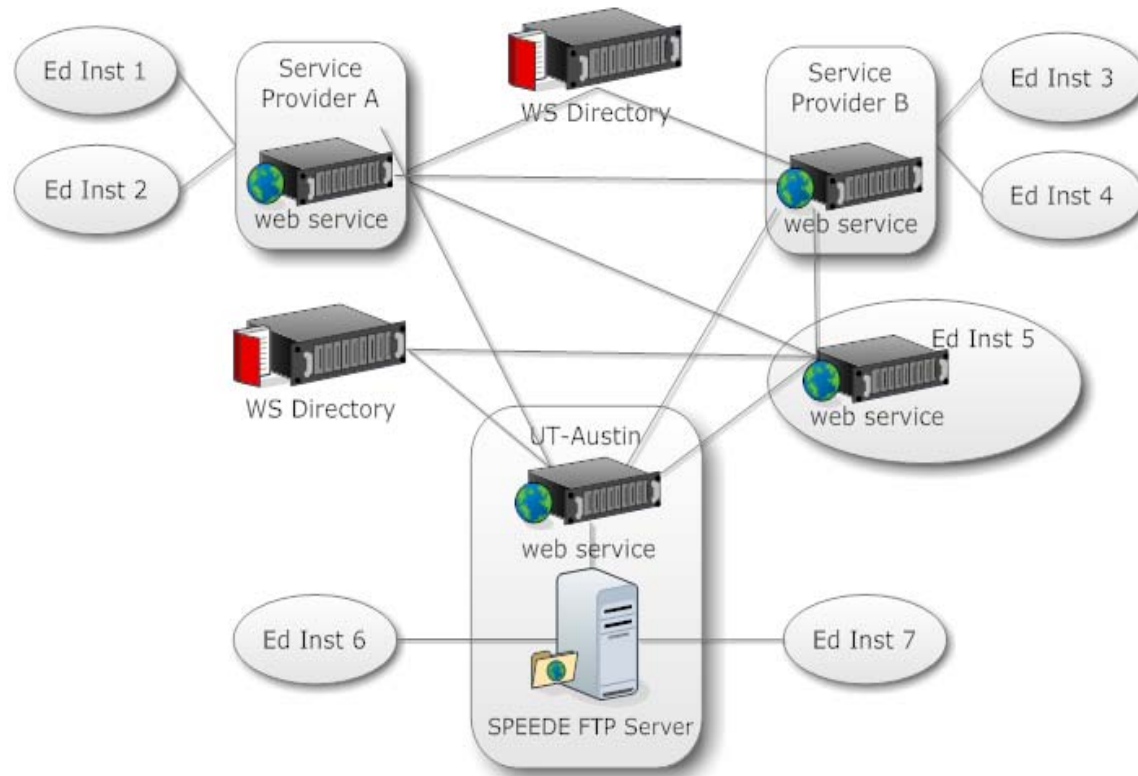

How do we better connect the Networks?

EDexchange (Point to Point)

EDexchange is ready

Development by the CCC Technology Center

Operated by PESC

Open Source through Apereo Foundation

System is ready to test

Governance in place

Pilot
